

MARVEL FAMILY ADVENTURE ATLAS

One universe. Many paths.

A choose-your-own-adventure watch planner for movies, television, animation, comics
and family nights.

ORIENT Who is watching?	CHOOSE Which doorway?	JOURNEY One chapter at a time.
REFLECT What changed?	BRANCH Follow curiosity.	EXPORT Keep the route.

How to use the Story Layer

This guide separates meaning from rendering: the same dataset can become a release-order marathon, a timeline, a family game, a character arc, a genre trail or a comic-source study. Every path remains reversible.

1. ORIENT

Choose viewers, media, maturity boundary and time.

2. CHOOSE

Select a route. It is a proposal, not a gate.

3. JOURNEY

Watch one chapter. Mark it complete or skip with a reason.

4. REFLECT

Use the prompt to compare memories, choices and consequences.

5. BRANCH

Follow a character, object, tone, team, universe or source.

6. EXPORT

Keep the route as this PDF, Markdown, JSON or a printed page.

Family game modes

- Memory relay: the least-frequent viewer predicts; experts ask questions and wait until the credits to correct.
- Connection detective: divide objects/organizations and relationships/promises between viewers.
- Hero draft: award points for rescues, sacrifice, successful plans, memorable entrances and honest apologies.
- Comic bridge: ask what came from comics, earlier screen versions, myth, history or genre cinema.
- Branch token: once per night, any viewer may replace the next chapter with a connected title.
- Recovery rule: skipping a title never invalidates the journey. Record why and continue.

Curated adventures

Route lengths use season-level records and planning runtimes. Streaming access and exact episode length vary.
